

POST CONCUSSION TREATMENT PROGRAM

**Woodstown Physical Therapy and Sports Rehab
Is now providing Post - Concussion Physical Therapy**

Woodstown Physical Therapy is pleased to announce that they will now be providing Physical Therapy for Post-Concussion Syndrome.

Patients presenting to physical therapy with post-concussion syndrome will receive a customized physical therapy treatment program to address symptoms of imbalance, headaches, dizziness, and neck pain. Treatments may include musculoskeletal therapy, balance exercises, vestibular therapy and functional training for return to sport.

Every patient with concussion will progress at their own pace. The overall goal is to individually manage each patient to a fast and full recovery.
